How many puppies were born alive?

How many puppies were born alive but died in the first week of life?

Have any of your puppies ever suffered from a birth defect or other congenital condition?
Please be as specific as possible in describing the condition, using the diagnosis made by your veterinary surgeon wherever possible.

Section D: Health conditions affecting dogs you currently own

This section is about any conditions affecting **dogs** that you have owned in the **past 10 years**.

Please note that we would like information on all conditions, not just those known to be inherited.

Have any of the dogs that you currently own ever suffered from a serious or persistent **digestive** system (including the mouth and teeth) condition? Symptoms might include regurgitation, vomiting, constipation, diarrhoea, weight loss, or a change in appetite

Have any of the dogs that you currently own ever suffered from a **heart** condition? Symptoms might include a cough, collapse, heart murmur, abnormal heart rhythm, exercise intolerance or difficulty breathing.

Have any of the dogs that you currently own ever suffered from a **respiratory** condition? Symptoms might include noisy breathing, wheezing, difficulty breathing, coughing, nasal discharge or exercise intolerance.

Have any of the dogs that you currently own ever suffered from an **eye** condition? Symptoms might include red eyes, a painful eye, overflow of tears or a loss of vision.

Have any of the dogs that you currently own ever suffered from a serious or persistent **skin or coat** condition? Symptoms might include hair loss, scratching or skin lesions such as pustules, crusts or scabs.

Have any of the dogs that you currently own ever suffered from a serious or persistent **ear** condition?

Have any of the dogs that you currently own ever suffered from a condition affecting the **bones, muscles or joints** (including the jaws)? Symptoms might include pain stiffness or lameness.

Have any of the dogs that you currently own ever suffered from a **nervous system** condition? Symptoms might include incoordination, paralysis, seizures (fits) or behavioural changes.

Have any of the dogs that you currently own ever suffered from a **reproductive** condition? Symptoms might include abnormal discharge, lack of fertility or nursing problems.

Have any of the dogs that you currently own ever suffered from a serious or persistent **liver** condition? Symptoms might include weight loss, jaundice or ascites (fluid in abdomen).

Have any of the dogs that you currently own ever suffered from a **urinary tract** condition? Symptoms might include incontinence, difficulty urinating, change in frequency of urination or drinking, or blood in urine.

Have any of the dogs that you currently own ever suffered from a serious or persistent **blood** condition? Symptoms might include bruising, bleeding or collapse.

Have any of the dogs that you currently own ever suffered from a **hormonal (endocrine)** condition? Symptoms might include excessive thirst, lethargy, poor growth, weight loss or weight gain.

Have any of the dogs that you currently own ever suffered from any **other** serious or persistent condition not covered in the previous questions?

Have any of the dogs that you currently own ever suffered from **cancer** not associated with the systems in the previous questions?

Section E: Cause of Death

This section is about any **adult dog(s)** that you have owned and that have **died in the past 10 years**.

For each dog that has died (or been euthanased) since 2004, please tell us about the cause of death or reason for euthanasia.

What age of dog(s) at time of death?

Please describe the reason(s) for euthanasia or cause(s) of death, if known

Was a post mortem (autopsy) performed?

Section F: Comments

This section provides space for you to make any additional comments that you may have on the questionnaire, this survey or

Specific issues you feel may be important to us. Your input is welcomed.
